Applied and Computational Mathematics (ACM) is an applied and computational mathematics journal of high quality, driven by the computational revolution and emphasizing innovative applied mathematics having potential for applicability and practicality. This journal is of interest to a wide audience of applied mathematicians and scientists concerned with the development of mathematical principles and practical issues in computational mathematics. All research articles in ACM will ...

Pure and Applied Mathematics Journal (PAMJ) is a mathematical journal for publishing early, high-impact results in the areas of mathematics and computer science/informatics. The journal also emphasizes mathematical articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, engineering and all applied sciences. For a paper to be considered for publication it is a precondition that it is not submitted for publication elsewhere and contains results ...

Description: Applied Physics is the study of physics mathematics and engineering. Engineering physics can be seen as a tool for optimizing and developing a solution to some engineering problems and solving them with the knowledge of statistic, mechanics, engineering and combination of other discipline.

Mathematics arises from many different kinds of problems. At first these were found in commerce, land measurement, architecture and later astronomy; today, all sciences suggest problems studied by mathematicians, and many problems arise within mathematics itself.
