We have updated the Lizard Evolution Virtual Lab based on feedback from field testers (over 50 classrooms!). The virtual lab includes four modules that investigate different concepts in evolutionary biology, including adaptation, convergent evolution, phylogenetic analysis, reproductive isolation, and speciation.

Misconceptions about evolutionary theory and processes. MISCONCEPTION: Evolution is a theory about the origin of life. CORRECTION: Evolutionary theory does encompass ideas and evidence regarding life's origins (e.g., whether or not it happened near a deep-sea vent, which organic molecules came first, etc.), but this is not the central focus of evolutionary theory.

Six-in-ten Americans say that “humans and other living things have evolved over time,” while a third reject the idea of evolution, saying that “humans and other living things have existed in their present form since the beginning of time.”

Public’s Views on Human Evolution | Pew Research Center

1 INTRODUCTION Evolution is the process of endogenous change in an open system, an idea that owes just as much to Smith and Hayek and liberal economics as it does to Darwin and biology.
