An In-Home, IoT Solution for Early Dementia Detection. The number of people with dementia is projected to double by 2030. To address this issue, researchers have developed an IoT health monitoring system to identify signs of Mild Cognitive Impairment.

## **IEEE Xplore Digital Library**

The inherent specificity and electrochemical reversibility of enzymes poise them as the biorecognition element of choice for a wide range of metabolites. To use enzymes efficiently in biosensors, the redox centers of the protein should have good electrical communication with the transducing electrode, which requires either the use of mediators or tedious biofunctionalization approaches. We report an all-polymer micrometer-scale transistor platform for the detection of lactate, a significant ...
