Objective. To demonstrate that six common errors made in attempts to change behaviour have prevented the implementation of the scientific evidence base derived from psychology and sociology; to suggest a new approach which incorporates recent developments in the behavioural sciences.

Why is changing health-related behaviour so difficult

I think the most crucial turning Turing missed in his lifetime was the one that would immediately have led him to showing that the first-order Peano Arithmetic has a sound, algorithmic, interpretation over the structure of the natural numbers.
