International Journal of Materials Science and Applications (IJMSA) is an interdisciplinary journal devoted to experimental and theoretical research on the synthesis, structure, properties and applications of materials. Particular interest is placed on materials having relevance to microelectronics, photonics and micromachining. IJMSA welcomes the following tier 1 article types: Book Review, Editorial, General Commentary, Hypothesis & Theory, Methods, Mini Review, Opinion, Original ...

SAM is an interdisciplinary peer-reviewed journal consolidating research activities in all experimental and theoretical aspects of advanced materials in the fields of science, engineering and medicine including synthesis, fabrication, processing, spectroscopic characterization, physical properties, and applications of all kinds of inorganic and organic materials, metals, semiconductors ...

Science of Advanced Materials – SAM

Advanced composite materials (ACMs) are also known as advanced polymer matrix composites. These are generally characterized or determined by unusually high strength fibres with unusually high stiffness, or modulus of elasticity characteristics, compared to other materials, while bound together by weaker matrices.

The BCIT Master of Applied Science (MAsc) in Building Engineering/Building Science is a two-year, full-time graduate degree designed to provide students with the capabilities to independently conduct rigorous, innovative research and publish, present and defend research outcomes to expert peers. Courses in the first year provide students with advanced knowledge and skills to achieve a holistic understanding of building performance. The second year is dedicated to the research thesis.
